**DETAILED ACTION**

1. Applicant's election without traverse of Group I (claims 1-36) in Paper No. 20031208 (file date of 12-8-03) is acknowledged. Please note the additional restriction resulting from this election:

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-34, drawn to a plastic optical element producing method and a plastic optical element producing apparatus, classified in class 264, subclass 1.1+.
  - II. Claims 35 and 36, drawn to a product-by-process plastic optical element, classified in class 359, subclass 642.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product made (i.e. the plastic optical element) can be made by a materially different process, such as etching or dipping or

coating processes.

---

However, should the Invention of Group I be elected, and the process of making of claims 1 and 18 found to be allowable, the withdrawn product-by-process claims which include all the limitations of the allowable process claims will be rejoined. At such time, it will have been determined that the process step limitations are critical to the patentability of the product-by-process, wherein these claims will need to be rejoined.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2873

6. A telephone call was made to Surinder Sachar (reg.no. 34,423) on January 12, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
